# MANAGED SPAM FILTER APPLIANCE

version: 2.1

## FULLY MANAGED NETWORK PROTECTION – NO OUTSOURCING OF PAYLOAD STREAM

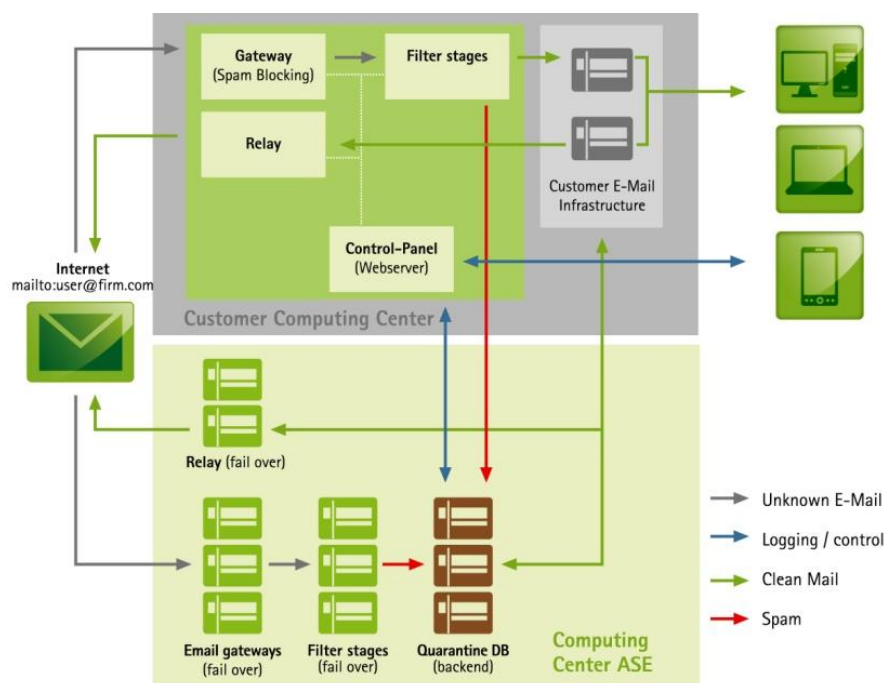

antispameurope's managed appliance offers enterprises with more than 1,000 employees the best of two worlds.

Our in-house solution offers round-the-clock support and proactive monitoring. With these features, it guarantees the protection from threats at the e-mail gateway offering antispameurope's well-known market-leading rates – 99.9 percent spam detection guaranteed with less than 0.0004 percent false-positives. On average, it detects even over 99.99 percent spam. Two independent virus filters and a malware URL filter additionally protect the network.

Maintenance effort for the IT department reduces to a minimum thanks to our fully managed solution. Customers re-

ceive a preconfigured system. They just need to connect and activate it – antispameurope's support attends to the rest. At the same time, customers benefit from the advantages of a highly redundant infrastructure: In case of overload from DOS attacks, spam waves or system failure, all or part of the load is transferred to antispameurope's infrastructure, which guarantees uninterrupted e-mail communication.

### CHARACTERISTICS – SUMMARY

- Fully managed appliance, 19" rack mount
